WORK EXPERIENCE

eLumen, Inc. - Minneapolis, MN

Software Engineer *May 2023 – Present*

- Led frontend architecture and development for Insights for Canvas Outcomes, establishing reusable components, localization patterns, and design patterns that improved maintainability, responsiveness, and scalability
- Own the remediation of critical and high-severity vulnerabilities identified through Snyk across application repositories, investigating root causes and implementing secure fixes
- Designed and implemented a template creation tool, streamlining the assessment plan creation workflow and reducing the time and effort required from users
- Leveraged Kiro throughout the software development lifecycle to accelerate AI-assisted requirements engineering, architecture/design, implementation, testing, and code review
- Integrated Datadog RUM to monitor real-user activity, track frontend errors, analyze user behavior, and identify application performance issues

Software Engineer Intern *June 2022 – May 2023*

- Aided in quality assurance testing by developing and executing automated test cases using Selenium and Sauce Labs
- Identified and resolved frontend bugs early in the application lifecycle, improving application stability and user experience
- Developed reusable React components for a responsive web application, improving consistency and maintainability across the frontend
- Contributed to developing a VPAT by evaluating application accessibility, documenting compliance strengths, and identifying accessibility gaps for remediation

SKILLS

Languages: TypeScript, JavaScript, Python, HTML5, CSS

Frameworks & Libraries: React.js, i18n

Cloud & Development: AWS, Serverless Framework, DynamoDB, S3, Redshift, CloudWatch **Tools:** Git, GitHub, GitHub Actions, Jira, Kiro, Selenium, Jenkins, Datadog, Snyk

Development Practices: Agile/Scrum, AI-Assisted SDLC, CI/CD

EDUCATION

Bachelor of Science **University of Minnesota, Twin Cities**

College of Science and Engineering *May 2023*

Major: Computer Science
